

Template for Reporting Proclamation Event Results

The purpose of this report form is to provide information for the Proclamation Evangelism Network to build a database of event results. The information will enable PEN partners to have a common frame of reference when discussing event impacts in the communities of North America.

Information compiled as a result of submitted forms will be available upon request to all PEN partner evangelists as they develop strategies to contribute to the overall objectives to saturate every community in the United States by 2015.
